

Well & Able COVID-19 Update

At this challenging time for us we are still open for business as usual. We are taking all the necessary precautions whilst remaining open and have implemented additional infection control procedures within our clinic and dispatch area.

Supplier Status

Supplies of our products are being disrupted, or they have the potential to be disrupted, as manufacturers are closed, or considering closing for various periods of time, for the health and safety of their staff.

Stocked Products

To mitigate this, we have ordered additional products from our suppliers to keep in stock so we can fill your needs as well as we possibly can. However, you may need to **consider alternative brands, models, styles and colours** to provide the support you need.

Plan Your Needs

Please plan your needs in advance if possible. If you have a particular size footwear already, for example a Medica Boston size 30 perhaps purchase the size 31 now so you know you have it when you need it. If you have need for our products please do not rely on **just in time availability**. Plan for there to be longer delays than usual in the delivery of products, unless we can supply them from what we have in stock.

Please contact us with your requirements and we can check what we have in stock

At this time it would be best to contact us to discuss your requirements and we will work with you to select suitable products for you from what we have in stock before we place orders with our suppliers.

Stocked Products

This [list](#) of products is what we are trying to keep in stock.
