AROUND THE WORLD

COLLECTION OF ORTHOPAEDIC FOOTWEAR

MedicaShoes™ is a European orthopaedic footwear manufacturer founded and created by a very inspirational mother who couldn't find the right correction footwear for her own daughter. She educated herself in the many challenging aspects of foot health, and alongside a team of neuro-orthopaedists, rehabilitation professionals and footwear manufacturing technicians, developed MedicaShoes™.

All MedicaShoes™ footwear provide the essential therapeutic support and stabilisation of the foot and ankle joints, whilst ensuring comfort and durability. MedicaShoes™ embodies high quality manual craftsmanship alongside quality construction materials to produce a specialist footwear range that meets the orthopaedic and therapeutic needs of children and adults.

Well & Able is a proud partner and supplier of MedicaShoes™ and other top-quality products and equipment for the children and adults of Australia and New Zealand.

No matter your child's unique footwear needs - whether your child has an existing foot condition or you simply want to try and reduce potential problems and promote correct development, MedicaShoes™ orthopaedic footwear will have a style to suit.

THERAPEUTIC, PROPHYLACTICS AND COMFORT FOOTWEAR

Ensuring a good support for your child's feet is important, especially during their younger years when their bodies are growing and developing.

Footwear that is supportive and well-fitting plays a vital role in the growth and development of your child's body, gait and posture.

MedicaShoes™ orthopaedic footwear, which is developed with growing little bodies in mind, can help to keep your child active, comfortable and pain free as they grow.

INCREASED STABILITY AND EXTRA SUPPORT FOOTWEAR

This range of orthopaedic footwear is designed to fit above the level of the ankle joint to provide extra support and stability for the whole foot and ankle. Each shoe model has a supportive heel counter or stiffener inside the heel of the shoe of a varying height. Each model therefore, with its own unique height heel stiffener, offers a varying level of orthopaedic support above the ankle.

This collection of footwear is designed to meet the unique support needs of those with significant alignment and stability requirements of the foot and ankle, and is available in a range of styles including open-toed sandals, closed-toed sandals and boots.

REVERSED LAST CORRECTION FOOTWEAR

Reversed last correction footwear is designed to correct feet with extreme varus and/or adduction.

The reversed last shape which in combination with an extended medial stiffener and toe cap, forms a curved medial wall preventing the foot from progressing further into adduction and stimulating correction.

SPECIALIST REHABILITATION AND EXTRA SUPPORTIVE FOOTWEAR

This specialist collection of orthopaedic footwear is specifically designed with extra height for children who require support of the lower leg, ankle and foot.

In the same fashion that an ankle foot orthosis (AFO), which is typically made of thermoplastics, controls or assists motion of the lower leg, ankle and foot, this specialist range of footwear, controls and stabilises motion of the lower leg, ankle and foot, but is constructed from natural breathable leather materials.

This provides an additional level of comfort for children who may have difficulty tolerating a typical thermoplastic AFO because of temperature or skin issues.
