

This is a custom made-to-measure shoe orthosis that combines the function of an AFO with the look and feel of a shoe.

- The construction of the shoe is all leather which breathes well in our climate and contours to the foot and ankle joints
- The use of BOA and Velcro make it easy to fasten the shoe and promote independence
- It is one shoe rather than an AFO and a shoe supplied separately
- There is a wide variety of colours and accessories to choose from to create your own bespoke Super Shoe

The Aurelka Shoe Orthosis is an innovative, cost-effective and streamlined solution.

With dedication and care,
The Well & Able Team
