

Gaiters

Ready Made and Made to Measure

Arm and leg gaiters are soft, comfortable and easy to apply and are recommended for prolonged stretch/immobilisation.

They are available as either:

- Straight or extension gaiters, which are used to maintain the arm or leg in extension for rehabilitation, prolonged stretch or immobilization purposes. Straight gaiters are available as either ready made or made-to-measure.
- Flexion gaiters, which are made at a requested angle of flexion, and are used to manage flexion contractures of the elbow or knee. Flexion gaiters are made-to-measure. The minimum flexion is 5 degrees and the maximum is 80 degrees.

Gaiters come with two lining options:

- Standard white cotton fabric lining or
- Deluxe padded terry towelling lining (or sheep skin padding upon request). Deluxe lining

Size Information for Standard and Deluxe Ready Made Gaiters

Standard Leg & Arm Gaiters come with a white cotton lining

Deluxe Leg & Arm Gaiters come with a padded towelling lining
